

Our Company

- Leading provider of AI technology developed and refined since 2006
- Management team consisting of industry thought leaders with 30+ years of experience in insurance and technology
- Selected by Global Insurance Accelerators as a cohort to showcase innovative technology solution

Our People

Rock J. Schindler, Founder and CEO

"We solve problems by refining data one word at a time"

Judith L. Haddad, President and CIO

"Our passion is to take sentence data and make it actionable"

Steven M. Lonergan, Chief Business Development Officer

"Enhance the productivity of your operational employees"

Dean H. Nelson, Chief Architect and Software Developer

"The road to success goes through data scientists"

"The problem is the inability to evaluate unstructured sentence data for business decisions based on judgment and assumptions. This means critical information needed to influence behavior and change outcomes is missing" - Rock Schindler, Founder and CEO

SDRefinery AI accelerates and promotes key assessments needed to improve core assumptions, desired behaviors and outcomes in underwriting, claims and overall risk management

Our Technology

Two core solutions: **SENTENCE AI** and **SUMMARY AI** offer breakthrough technology that transforms businesses

- Cleans the data
- Tags every word and phrase
- Extracts events configured to company needs
- Examines and organizes according to defined parameters
- Summarizes information according to user specs

The average person reads about **13** sentences per minute

Our technology reads over **250,000** sentences per minute

The average reading comprehension of a person is about **60%**

Ours technology comprehends about **99%**

Value Proposition

Accessing the treasure trove of knowledge stored in the myriad of sentence data, accelerates the enhancement of judgment and intellectual capital, creating:

- **Faster Access:** read millions of records in just a few hours, with 100% transparency
- **New Knowledge:** read entire population to identify behaviors
- **Consistent Measurement:** read every record the same way, today and tomorrow after initial configuration
